

MOHAMMAD BANISSI

b. January 3, 1992, Iran

Early childhood years prior to primary school, made Mohammad's disabilities apparent. He began speech and behavior therapy under the supervision of specialists. At the age of 6 he was miraculously saved by doctors from severe meningitis. He was forced to enter the special children's program as experts did not deem him fit to study at the regular program. Middle school was his last educational year, after which he began his artistic activities with the support of his parents. He is currently practicing painting, sculpture, and piano at Gallery Outsider Inn with Morteza Zahedi, his agent. He has had many solo exhibitions in Iran and Europe in the past few years.
